

# NUCLEAR MEDICINE

4ways was established in 2005 and has since been providing remote radiology reporting and radiology clinical audit services across the UK. Nuclear Medicine (NM) reporting services have been provided since 2008.

Recent technical and clinical advances within the modality, with the introduction of hybrid functional and anatomical imaging have prompted us to expand our reporting platform and 4ways is now pleased to be able to include SPECT-CT and PET-CT reporting services.

This development will ensure that 4ways can provide a comprehensive nuclear medicine reporting service to support both regular and ad-hoc requirements, such as annual leave or long term absence that may create a shortfall in your nuclear medicine reporting capacity.

Our service can also be used for double reporting complex scans and any external auditing requirements you may need.

Our service will be provided in partnership with your ARSAC licence holder and include ISAS 10% audit provision for all reporting undertaken by specialist nuclear medicine reporters.

## Operational/technical workflow

- + **4ways Nuclear Medicine reporting service is offered as a completely independent and secure uni-directional workflow**
- + **Nuclear Medicine studies are sent to a dedicated receiving DICOM node hosted at 4ways**
- + **The workflow is designed on a PACS to PACS topology**

- + **4ways Nuclear Medicine reporting Radiologists will provide a comprehensive report which will be securely uploaded into your RIS by our highly trained radiology operations team**
- + **4ways service delivery team will assist you throughout the implementation and setup of the service**

## Reporting Radiologists

Our clinical lead is Dr Charlotte Fowler MBBCh, MA, FRCR, MD, MSc, a consultant radionuclide radiologist for the past 13 years, with experience in both DGH and teaching centre settings.

Dr Fowler is supported by a team of hand-picked consultant colleagues, all of whom are leaders and teachers in their fields. All 4ways NM reporters are: trained and based in the UK, on the specialist GMC register in substantive nuclear medicine physician, radionuclide or nuclear cardiology consultant posts, and Fellows of the RCR or RCP.

Our NM reporting service will be provided in partnership with your ARSAC certificate holder, and includes 10% audit provision for all reporting.

## Turnaround times

Turnaround times and prices for nuclear medicine reporting are flexible. Our Business Development team will be happy to discuss your requirements further.
