

CT colonography

**Flexible reporting, when you need it most.
Access the 4ways CT colonography reporting
service quickly and easily**

Computed tomographic colonography (CTC) has transformed patient care and is better tolerated by patients. It has also been proven to provide highly accurate visualisation of the unscoped colon and extra-colonic organs.

Recommended by the ESGE/ESGAR, CTC is now the radiological examination of choice for the diagnosis of colorectal neoplasia. CTC is also strongly recommended when endoscopy is contraindicated or not possible¹.

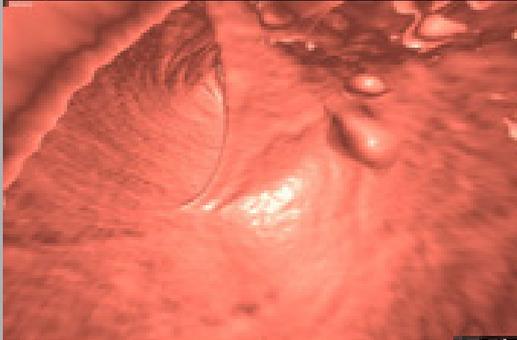

4ways offers rapid CTC reporting turnaround times provided by a well-respected team of super-specialist CTC radiologists.

4ways uses the Biotronics 3D™ cloud-based software solution. It is more powerful and faster than standard PACS viewing, allowing for very rapid surface rendering, 2D and 3D multi-planar fly-through reconstructions (MPR).

- + strong clinical leadership led by Dr Andrew Wright
- + ≤72hr turnaround times
- + flexible service
- + no volume commitment
- + free and easy set-up and 24/7 support
- + expert audit of 1:10 reports
- + using best-in-class Biotronics 3D™ software
